JOY is a four-minutes 3D animated short about coping with losing a pet. The story follows a young photographer named Ann, who is grief-stricken after the loss of her beloved cat, Joy. Then she is transported into a magical world inside her camera, where she reunites with Joy and re-experiences the memories they shared. We hope this story will comfort those who have lost their pets and will provide the hope that death is never the end of the memories.

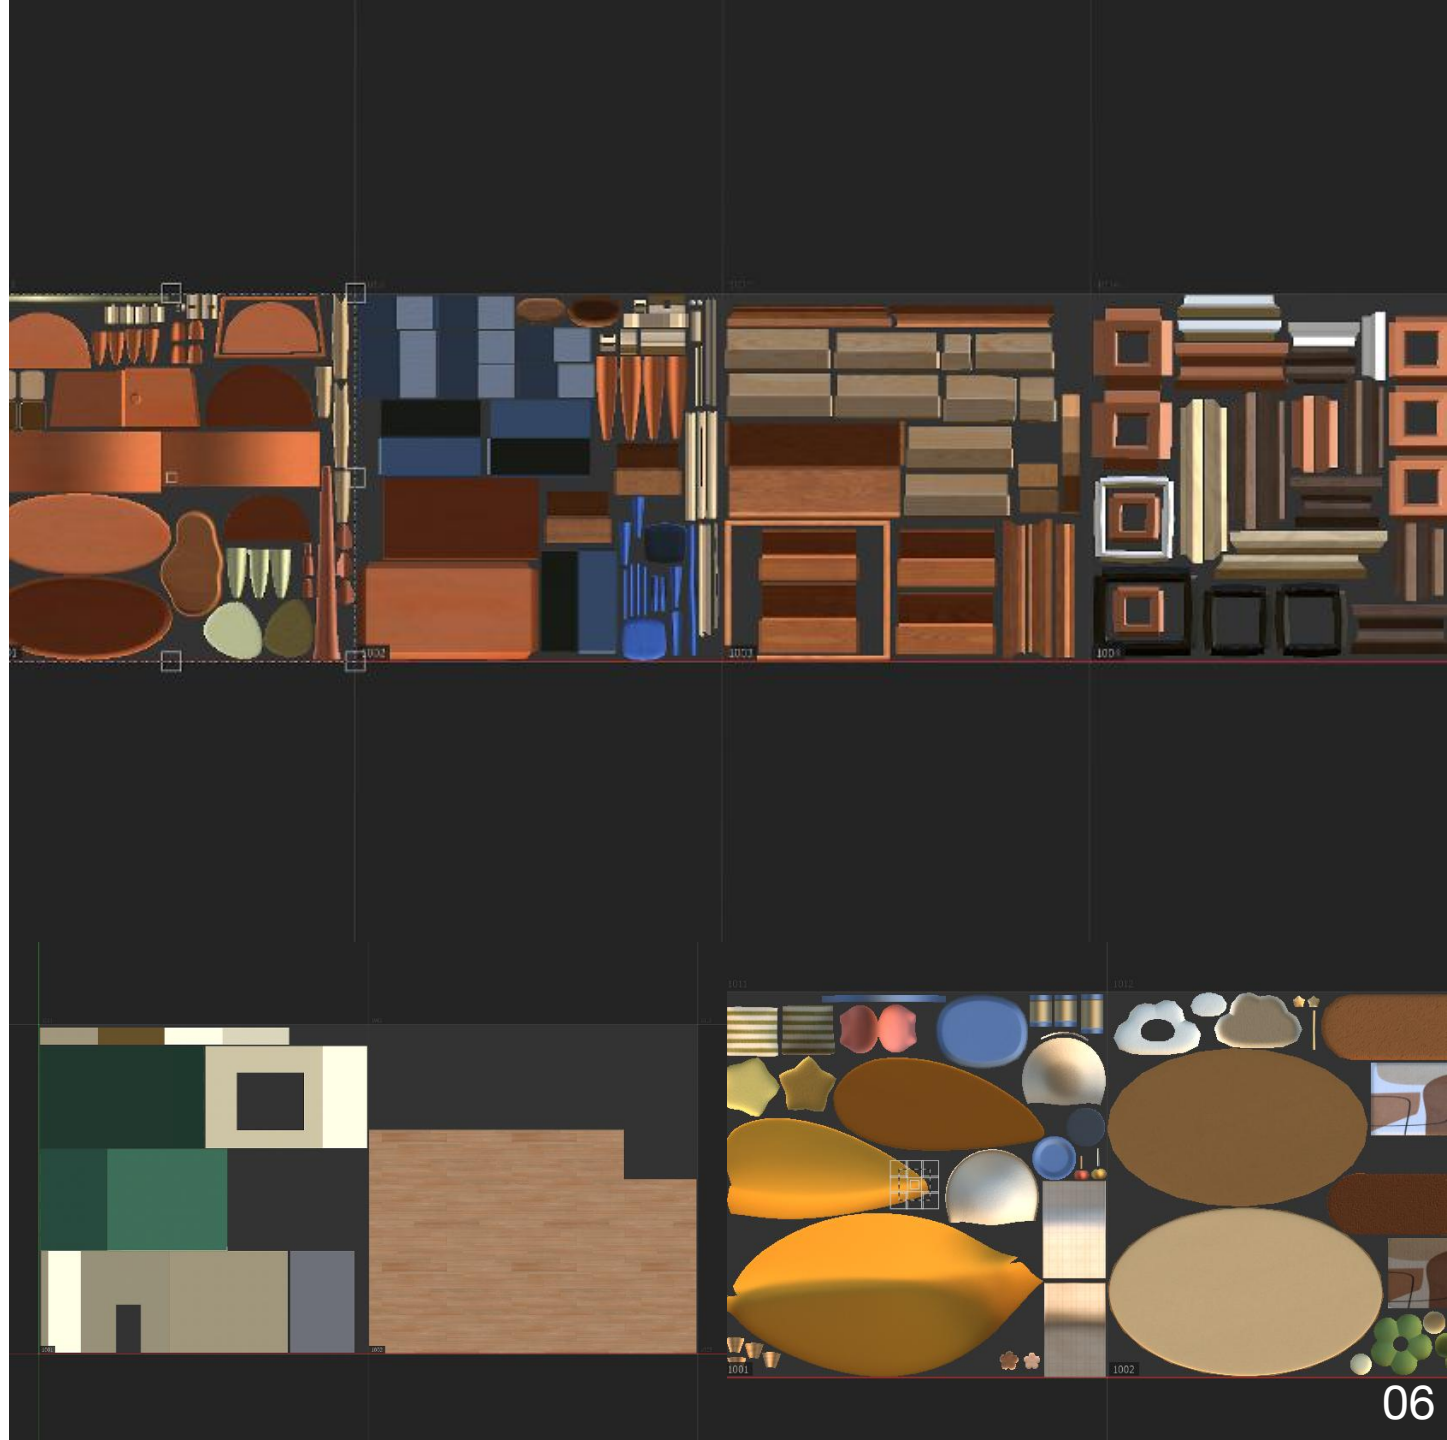

My Responsibility: Story Development, 3D Modeling, Texturing, Character Animation, Production Management.

- 3D Modeling base on 2D Concept Art Design
- Software: Autodesk Maya

-
- Texturing: break down model groups base on material
 - Software: Substance 3D Painter
